CLINICAL EXPERIENCE

Senior Staff Nurse — Cleveland Clinic Abu Dhabi (24-bed Adult ICU)

Abu Dhabi, UAE · 09/2021 – Present · Full-time

- Primary RN at 1:2 ratio for high-acuity adult ICU patients including post-cardiac-surgery, septic shock, ARDS, and DKA on multiple drips and ventilator support.
- Performed and documented CRRT (Prismaflex), arterial-line placement assistance, central-line dressing changes, ventilator titration, and proning protocols for ARDS patients.

- Co-led unit-based CAUTI reduction project across 18 staff RNs; rates fell from 2.4 to 0.6 per 1,000 catheter-days over 9 months.
- Precepted 6 newly hired international RNs through the 90-day onboarding pathway; 5 of 6 cleared independent practice on schedule.
- Charge nurse for 14 night shifts/quarter; coordinated rapid-response activations and floor admissions in coordination with the resident team.
- Epic super-user; trained 11 staff RNs on the 2023 module upgrade.

Staff Nurse — Manipal Hospitals (16-bed Medical ICU)

Bangalore, India · 03/2017 – 08/2021 · Full-time

- Primary RN at 1:2/1:3 ratio for adult medical ICU population including sepsis, COPD exacerbation, and post-stroke care.
- Cared for ventilated patients (Hamilton, Drager); managed weaning protocols in collaboration with the intensivist team.
- Contributed to a CLABSI reduction initiative (chlorhexidine bathing protocol); unit rate fell from 1.8 to 0.5 per 1,000 line-days.
- Selected for the COVID-19 surge team during 2020–2021; rotated through proning and ECMO-support coverage.

CLINICAL SKILLS

Settings: Adult ICU (medical, surgical, cardiac post-op), step-down, COVID surge **Procedures:** IV insertion (peripheral, ultrasound-guided), NG/OG tube placement, indwelling catheter management, wound vac, chest tube monitoring, code response (ACLS-led) **Equipment:** Hamilton G5, Drager Evita, Prismaflex CRRT, ECMO support (assist role), balloon pump monitoring, Philips IntelliVue **EHR:** Epic (super-user, 3 years), prior Cerner experience **Patient populations:** Adult medical/surgical ICU; COVID-19 critical care; post-cardiac-surgery
